

Employee HR Data Analysis for Effective Workforce Management

OUTLINE

Executive Summary

Introduction

Methodology

Results

Conclusion

Appendix

EXECUTIVE SUMMARY

- Analyzed a dataset of 6,820 employee entries detailing demographics, salaries, performance ratings, and job roles.
- Key observations include:
 - Performance rating shows a weak correlation with salary.
 - Notable differences in average salaries among departments.
 - Significant gender and educational disparities in salary distribution.

INTRODUCTION

- Purpose: To evaluate the employee dataset to understand workforce demographics, performance ratings, and salary distributions.
- Importance: Insights from this analysis can inform HR policy, recruitment, and retention strategies.

METHODOLOGY

- Simulated real-world HR dataset cleaned and standardized to ensure accuracy.
- Statistical analysis including correlation studies and salary comparisons by department and role.
- Visualization of hiring trends, employee demographics, and performance ratings.
- Comparative analysis of performance ratings across departments and educational levels.

RESULTS

Employee Composition:

- Active Employees: 5,801 (85.06%),
Terminated Employees: 1,019 (14.94%)
- Gender Distribution: Slightly higher female representation (3,049) than male (2,752)

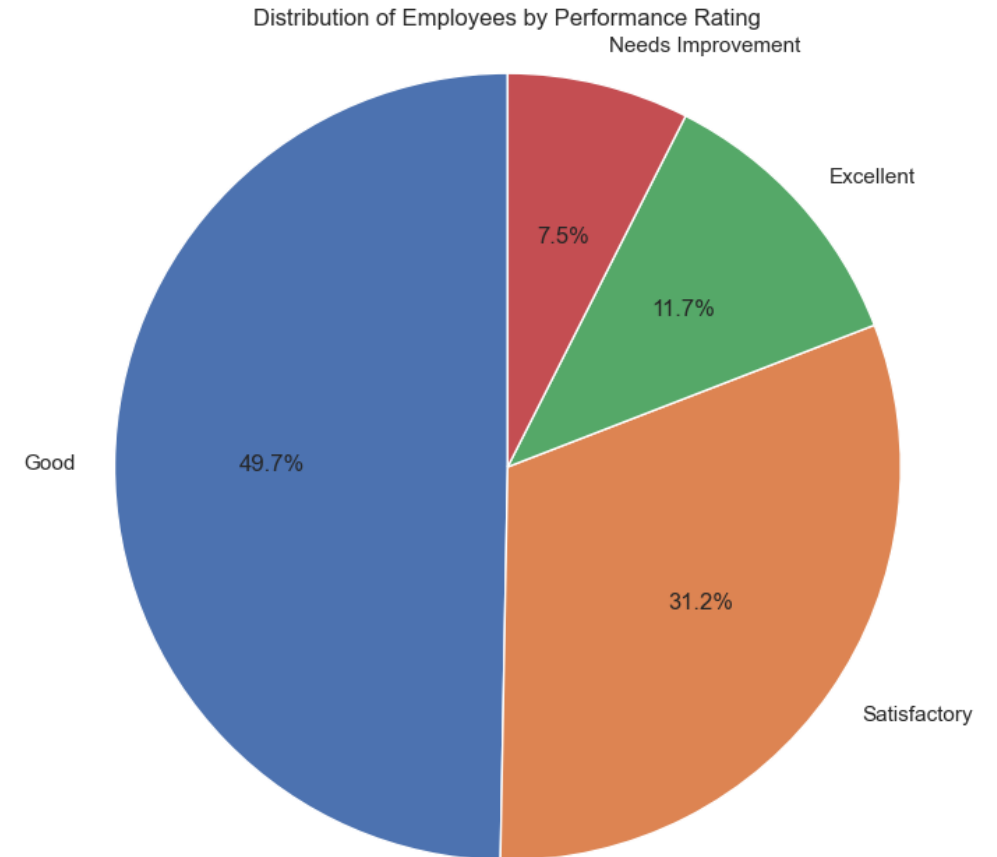

Salary Insights:

- Average Salaries by Department:
 - IT: \$82,129
 - Finance: \$77,424
 - Sales: \$75,730
 - Marketing: \$67,288
 - Customer Service: \$65,667
 - HR: \$65,492
 - Operations: \$64,538
- Significant variances observed in salaries based on education level and gender.

Job Title	Salary
Finance Manager	\$126,316
IT Manager	\$121,784
Sales Manager	\$112,187
Marketing Manager	\$102,353
Operations Manager	\$94,942
Software Developer	\$92,848
HR Manager	\$89,146

Content Creator	\$61,518
Customer Service Representative	\$61,447
Support Specialist	\$61,340
IT Support Specialist	\$61,251
Inventory Specialist	\$61,164

Performance Ratings:

- Majority (approximately 50%) rated 'Good'; 7.5% 'Needs Improvement.'
- Performance ratings bridge no significant salary gaps across departments or gender.

Terminations and Hires

Employee Terminations per Year (2015-2024)

Employee Hires per Year (2015-2024)

Terminations and Hires – Findings and Implications

- While termination rates are consistent with departmental sizes, an upward trend continues.
- A reassessment of retention strategies is crucial to mitigate risks associated with employee shrinkage.
- Peak hiring year: 2017; Low in 2021; Sideways trend in hiring.
- Management and allocation of resources must be reassessed to ensure future employment growth.

Educational Impact

Bubble Chart of Education Level and Age Group

Educational Impact – Findings and Implications

- Bachelor's holders dominate across age groups (especially 35-44, accounting for 23%)
- Men tend to earn more with a high school diploma or bachelor's degree, while women earn more in the master's and doctoral levels.
- There is a need to filled skilled roles necessitating potential improvements in recruitment tactics
- A significant salary difference based on gender highlights an underlying issue of pay equity

Conclusion

ACTIONABLE INSIGHTS

- Companies seeking to attract top talent should immediately bridge gender pay disparities which will boost morale, retention, and corporate reputations
- Companies should create salary-based incentives tied to performance across departments, thereby enhancing overall employee performance ratings and workforce quality
- Organizations should emphasize developmental programs to foster higher qualifications among employees as educational attainment plays a crucial role in salary scales
- Organizations facing multiyear growth in termination rates need to conduct further investigation into workplace satisfaction and retention strategies
